QA Webinar Series

“Through the Looking-Glass”

$99

- Through The Looking-Glass With GABA
- Through The Looking-Glass With Taurine
- Through The Looking-Glass With Glycine
- Through The Looking-Glass With Histamine & Acetylcholine
- Through The Looking-Glass With Serotonin

**WHY “Through the Looking-Glass”?**

In 1871 “Through The Looking-Glass & What Alice Found There” was written by Lewis Carroll (Charles Lutwidge Dodgson) as a sequel to “Alice's Adventures in Wonderland” (1865) which begins outdoors, in the warm month of May.

“Through the Looking-Glass” begins indoors on a snowy, wintry night in November and uses frequent changes in time & spatial directions as a plot device, many mirror themes: opposites, time running backwards, and so on.

Instead of looking at the “Wonderland” of the QA Protocol as a series of organized steps from beginning to end, this series of QA Webinars looks at neurotransmitters & their presence in the QA Protocol at different times & from different points of view, running backwards from our usual perspective.

These Webinars discuss how neurotransmitters mirror parts of the QA Protocol, looking at the QA Protocol from the inside-out, so to speak; opposite from our usual approach. Each neurotransmitter discussed mirrors the importance of the QA Protocol from varied perspectives and heightens the importance of an integrated approach to patient care.

On might say that manual muscle testing and the QA Clinical Protocol takes you on a fascinating journey “Through the Looking-Glass” to further experience and explore the “Wonderland” of human function.
